Reference Docket Control Number: SW-02361A-08-0609

Dear Sir or Madam:

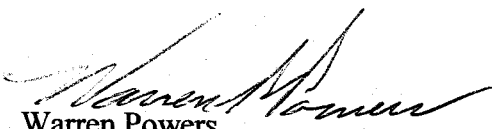

I am writing this letter in support of the decommissioning of the old sewage treatment plant located in the Boulders Community of Carefree.

Our home is located approximately 500 ft to the west of the plant at 1501 Indian Rock Road and we are frequently bothered by odor from the plant, as well as what seems to be almost continuous maintenance work at the sight.

In spite of best efforts it seems the plant is simply too old both physically and technologically to be effective.

I strongly recommend the site be decommissioned.

Respectfully,

Warren Powers
1501 Indian Rock Road
Carefree, AZ 85377

**Black Mountain Sewer
Docket Control No. SW-02361A-08-0609**

Dear Commissioners:

I support de-commissioning the Black Mountain Sewer Processing Plant located in the midst of a beautiful residential neighborhood within 100 feet of adjacent residences and a few lots from my Boulders home.

I recognize that there will be some costs to Black Mountain Sewer users involved in this de-commissioning and remediation effort, and I am more than willing to accept my share of these costs.

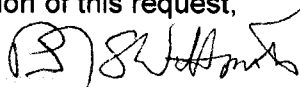

Listed below are the problems my neighbors and I are experiencing, and have experienced for years, prompting me to write this letter:

- **Strong and nauseating odors, offensive to both Boulders residents and Boulders Resort guests**, frequently coming from the Processing Plant
- **Health concerns from chemicals** required to be inserted in an attempt to mitigate the odors
- **Loud noises** coming from the Processing Plant
- **Frequent repair and pumper trucks** driving through the residential neighborhoods of the Boulders, and parking in front of the Processing Plant
- **Decreased home and property values** because of the proximity of the Processing Plant to many homes within the Boulders, and the odors, noises and truck traffic associated with the Processing Plant

Obviously, it would be more efficient to de-commission the Processing Plant now, rather than continue to waste more funds each year in costly repairs and then de-commissioning the Processing Plant and remediating the land at a later date.

Thank you for your consideration of this request,

Peter & Michele Willmott
1049 Boulder Drive

Docket Control No. SW-02361A-08-0609

Dear Commissioners,

I support de-commissioning the Black Mountain Sewer Processing Plant located in the midst of a beautiful residential neighborhood within 100 feet of adjacent residences.

The problems my neighbors and I are experiencing from this antiquated and mal-functioning Processing Plant are identified below:

- **Strong and nauseating odors, offensive to both adjacent and near-by homeowners and Boulders Resort guests** coming from the Processing Plant
 - **Health concerns from chemicals** required to be inserted into the Black Mountain Sewer system from pumper trucks at different locations of the system trying to mask the odors
 - **Loud noises** coming from the Processing Plant
 - **Frequent repair and pumper trucks** driving through residential neighborhoods to service the Processing Plant, and parking in front
 - **Decreased home and property values** because of the proximity of the Processing Plant to many homes within the adjacent residential neighborhood and the frequent heavy truck traffic required to service the Processing Plant
 - **It would be more efficient to de-commission the Processing Plant now,** rather than continue to waste more funds each year in costly repairs and then de-commissioning the Processing Plant and remediating the land at a later date.
 - Other reason(s):
-
-

I recognize the value of de-commissioning this Sewer Processing Plant and believe that the modest cost involved in accomplishing this now would be a wise investment for the future.

Thank you for your consideration,

Black Mountain Sewer
Docket Control No. SW-02361A-08-0609

Dear Commissioners,

We strongly support de-commissioning the Black Mountain Sewer Processing Plant located in the midst of a beautiful residential neighborhood within 100 feet of adjacent residences. We recognize that there will be some costs to Black Mountain Sewer users involved in this de-commissioning and remediation effort, but we are willing to accept our share of these costs.

We have been residents of the Boulders for many years. In fact, before we bought our first house at the Boulders in 1999, we had experience with this problem going back over 25 years ago when relatives bought a house in the North Community that was sometimes "down wind" from this processing plant. We have experienced this unpleasantness for all too many years. It was bad then and worse now.

Beyond the offensive odors in an otherwise great environment, there are other related problems including:

- Chemicals required to reduce the odors
- Loud noises from the plant
- Decreased home and property values due to the plant

It would be better to de-commission the plant now, rather than continue to waste more funds each year in costly repairs and then de-commission this plant.

Thank you for your attention to this important issue.

Sincerely yours,

Paul W. Earle and Ellen A. Rudnick
